SKILLS

- Sketching
- Prototyping
- Designing in Figma
- Engineering-grade 3D printing
- Process management & ISO 9001
- Project management with Jira

AI tools:

- Web development with Claude
- Research and agent building
- Image and video generation

SOFTWARE

3D Modelling:

- Rhinoceros & Grasshopper
- SolidWorks
- Blender
- Fusion 360

Rendering:

- KeyShot
- Nano Banana

Image & video:

- Illustrator
- Photoshop
- Premiere
- InShot

Miguel Margenat

INDUSTRIAL DESIGNER · R&D AND PRODUCT DEVELOPMENT

I'm an industrial designer with a degree from the University of Buenos Aires and experience developing products across a range of industries. Naturally curious, I enjoy the many facets of design.

Experience

Head of the Product Department

Jul. 2024 – Jul. 2026

López Hermanos — Volta, Topmega & SportAce Bicycles

I led the R&D department and developed the product portfolio, working closely with sales, purchasing, e-commerce, manufacturing, IT, marketing, planning and the design teams.

After a year spent organising processes and documentation, we achieved ISO 9001 certification for the department.

KEY RESPONSIBILITIES

Development:

End-to-end project planning and tracking; led industrial and graphic design to define the look & feel, taking technical and manufacturing constraints into account.

Line-up:

Built the brands' complete product line-up, with a development roadmap for each segment, a scalable pricing structure and demand-based purchasing forecasts.

Reporting:

Results reporting and KPI tracking for the department's quarterly and half-year reviews.

Market:

Global trend and technology analysis, user research and understanding of market needs.

Suppliers:

Liaising and negotiating with international suppliers for sourcing and manufacturing in China.

Training:

Training sessions every two months on new products and the catalogue, giving other departments the tools they need.

Designer & Draughtsperson

Sept. 2021 – Aug. 2024

Ugarte Autobuses

3D design and modelling of vehicle parts, sub-assemblies and assemblies, plus technical documentation to streamline production, in an ISO 9001-certified environment. I documented and redesigned existing assemblies using steel and aluminium profiles, fibreglass, thermoformed parts and laser-cut sheet metal, and monitored production on the shop floor.

Co-founder

Nov. 2019 – Jul. 2025

@Lunfardo.Lab — Independent brand

Skills developed:

- Product line development and parametric modelling in Grasshopper
- Running machines for continuous production
- E-commerce, sales strategy and brand building
- Photography & video: creative direction and execution

Education

University of Buenos Aires

- Industrial Design (2016–2024)
- Graphic Design (2014–2015)
- Morphology Research Internship (2025)

Courses & Training

- Bicycle Mechanics CiCat (2015)
- Welding · ESAB (2018)
- Blender for Architecture (2024)

Liceo Cultural Británico (2014–2017)

English: intermediate spoken, advanced written.

Spanish: native.
